## RENAISSANCE

Literally the reversal of learning. The period from 1450 to 1517, when a transition from the medieval to the modern world occurred in Europe, especially in literature and art. Briefly, it was the bringing to light and general use of forgotten arts and sciences, blending such knowledge with the present, and building therefrom the

future of the useful arts and human  
philosophy of the modern world

1450

German printer named Johannes  
Gutenberg discovered how to use  
movable type for printing

1450

Gutenberg invented  
printing with metal types

mud and wack houses succeeded by  
stone edifices on piles (1450); had 50,000  
building and several hundred population  
on arrival of Spaniards 1519

1450

England  
insurrection of Jack CADE.  
Richard, duke of YORK claims  
the throne.

C1450

The Renaissance, at first a literary revival, now extends to art in general, particularly architecture.

Architecture is influenced throughout central and western Europe.
